

Clinical Data Guide for Wave 4: Reference for Finding Clinical Data

With the Epic system implementation spanning over the next several years, the location of patient information will be in-flux until Epic is fully live at all sites. The table below shows which data from the Wave 4 practices will be in Epic on April 30, 2023.

Specifically, **data from our heritage systems will continue to be incrementally loaded into Epic over the next several months** so you will still need to access heritage systems to view some data which has not yet been imported into Epic.

Please note, you might see more data in Epic than what is listed in the table below, as additional heritage data is being added incrementally. Newer versions of the guide will be shared as additional heritage systems data is added to Epic.

Data Type Category	Data Type Sub-Category	System/Location	In Epic from this Date Range	In this Epic Activity	Look in Heritage EMR for these date ranges
RESULTS	Discrete Ambulatory Reference Labs (Labs that are sent outside of RWJBH Hospitals)	POWERWORKS/BHMG	1/1/2016 – 3/31/2023	Chart Review → Lab Tab	4/1/2023 – 4/30/2023
RESULTS	Labs and Radiology performed at RWJBH facilities	EPIC	1/1/2016 – current	Chart Review → Lab Tab	
SCANS	Scanned Documents for sites that are not live on Epic	POWERWORKS/BHMG Cerner Millennium and 3M (Hospitals)	1/1/2016 – 12/31/2022 1/1/2021 – 12/31/2022	Document Management Chart Review → Media Tab	1/1/2023 – 4/30/2023 1/1/2016 – 12/31/2020 1/1/2023 – 4/30/2023
*TEXTUAL NOTES	Notes for sites that are not live on Epic	POWERWORKS/BHMG Cerner Millennium (Hospitals) MOSAIQ & ARIA ENTERPRIZE RADONC	1/1/2016 – 3/31/2023 Many key notes are current due to interim interface	Chart Review → Notes, Lab, Imaging, Cardiology Tabs	4/1/2023 – 4/30/2023
VITALS	Vitals - last height, weight, blood pressure (Adult)	POWERWORKS/BHMG	1/1/2016 – 3/31/2023	Review Flowsheet Activity	4/1/2023 – 4/30/2023
VITALS	Vitals - all height, weight, blood pressure, head circumference (Pediatric)	POWERWORKS/BHMG	Before 3/31/2023	Review Flowsheet Activity	4/1/2023 – 4/30/2023

*Textual Notes:

Signed notes from the ambulatory EMRs: Documents must be signed before being extracted

Catch up Loads for data up to April 30, 2023. Timeline for additional catchup data loads:

Ambulatory Reference Lab Results, CCDs, and Vitals: 3 weeks after Go-Live

Textual Notes: 45 to 60 days after Go-Live. This allows documents to be signed before the extracts.

Scans: approximately 120 days after Go-Live
