Accessing Heritage Data Cont...

Where to Locate Heritage Data

- With the Epic implementation spanning the next several years, the location of patient information will be in flux until Epic is fully live at all sites.
- Data from our heritage systems will continue to be incrementally loaded into Epic over the next several months.
- You will still need to access heritage systems to view some data which has not yet been imported into Epic.

Baxter IV Pump Integration Trouble Shooting

Steps to Resolve Baxter IV Pump and Epic Integration Issues

- If you encounter any issues with the Baxter IV Pump and Epic Integration, please follow the steps below:
 1. Call informatics in real-time to assist with troubleshooting any Pump/Epic Integration issues.
- If informatics cannot resolve the integration issues, take the following actions:
 - 1. Immediately isolate the pump and flag for biomed.
 - 2. Enter a Verge incident.

ED RNs - Releasing Admission Orders

ISSUE: Admission orders are not being released in a timely

fashion.

- Background: When a provider places admission orders for a patient through the Admission Navigator currently in the Emergency Department (ED), most orders default to signed and held.
- The Joint Commission considers patients admitted and boarding in the ED greater than 4 hours as admitted.
- As a safety net, Epic provides a Best Practice Advisory (BPA)
 - alert and an icon appears on the ED Track Board reminding that the ED nurses should release the admission orders. Recommendation: Remember to watch for the BPA alert and
 - the icon on the **ED Track Board** and release held admission orders proactively.

Patients Preassigned to a Unit vs. Assigned to a Unit & Bed

- Bed Management can pre-assign the patient to a unit without assigning a bed.
- The unit will see the patient in Incoming Transfers on their Unit Manager. This allows the unit to view the patient's chart by double-clicking on the patient. This also gives units an idea of how many patients they could expect to be assigned to their unit once beds become available.

Proprietary and confidential for internal use only.

Nursing Change Readiness Topics

Patient Flow Guide

 Patient flow is how patients move from one area of RWJBH-Rutgers to another within Epic.

Key Patient Flow Nursing Topics »

 Remember that all patient movement scenarios are clearly outlined in the **Patient Flow Guide** on your Learning Home Dashboard. Press **F1**.
